

Installation Instructions for the Latest Version

Step 1: Install version 7.6 (Nulled version to bypass license restrictions).

- Extract the file Magicai-Server-Files-v76-nulled-by-ekr.zip which is located inside MagicAi7.6-Nulled-ByEk.zip.
- Upload and extract Magicai-Server-Files-v76-nulled-by-ekr.zip to the **root directory** of your website.
- Complete the installation process and connect your database.
You will find a video tutorial explaining the installation steps in this document: [link].
- In the files, you will find an SQL file named **License-ByBass-By-Ekr.sql**.
Import this file into your database.

Then, visit the following URLs:

yourdomain.com/update-manual

yourdomain.com/cashe-clear

After that, go to your main website yourdomain.com — everything should be working correctly.

Step 2: Login

Use the following admin credentials:

- **Email:** admin@admin.com
- **Password:** 12345678

From the sidebar, select "**Update**"

- Click the **Update** button and complete the update process.
- Then proceed to install the **extensions** and **themes**.
